

### A rugged, phone-based system that delivers all these features:

- Instantly send loads, updates and changes to drivers
- Track truck locations in real time via built-in GPS
- Get automatic load statuses
- Conduct inspections
- Capture signatures electronically
- Send and receive dispatch text messages
- Print manifests and BOLs using optional printer
- Store and forward data
- Use as a walkie-talkie and cell phone
- Interface with CargoTel Web-based TMS or legacy systems
- Adapt to English and Spanish users
- Sets up in minutes, not weeks

## Driver Wireless LMS

Much lower costs and greater functionality compared to satellite and other fixed-mount or hand-held systems.

- Order Receipt
- Status Updates
- Printing & Faxing
- Signature Capture
- Inspections
- GPS
- Messaging
